Full Stack Developer

Education

University of Denver	*January 2023*
Full Stack Web Development Boot Camp	

Projects

Dev.log *Demo Repo*   *January 2023*
Social Network for Developers

- Created the models and built out the back end functionality. Made logic for the react components to send and receive data from our servers.
- Implements user verification using JWT. Incripts user passwords, allows for post creation with image upload via Cloudinary.
- Built using MongoDb, Express, React, and Node.

DevDive *Demo Repo*   *December 2022*
Recruitment Concept for Developers

- Worked on the user authentication and implementing user mutations to profiles
- Includes user verification using JWT. Incripts user passwords, allows for post creation including image upload via AWS Bucket.
- Built using MySQL, Express, Handlebars, and Node.

National Park Finder *Demo Repo*   *November 2022*
Search for National Parks by State

- Designed the visuals and wrote logic for fetching and storing data from API's.
- Fetches data from an API and returns to the user with a polished interface. Stores previews searches in local storage.
- Built using HTML, BootStrap, Waze API, and the Nation Park Services API.
